

Finger Protector at Work

Finger Protector™ is designed to allow easy access to the hinge area for maintenance and decoration

● Proven effectiveness

Used exclusively by Tesco, McDonald's Restaurants, TGI Friday's Restaurants and many major private and public organisations, for round the-clock safety protection.

● Award Winning

Selected by the Design Council, as one of the prestigious Millennium Products. Holder of the London Business Award for innovation for two years running.

● Praise for Finger Protector

'I've seen the horror of a pupil's finger amputated by the hinge side of a classroom door. This new device would no doubt have saved the loss of the child's finger.'

Rod Hall, as Head Teacher, Kenningtons Primary School

'As simple as fitting a light bulb'

McDonald's Restaurants

'So unobtrusive it's almost invisible'

TGI Friday's Restaurants

'I applaud the ingenuity and simplicity of this product'

Nick Raynsford, as Under Secretary of State

Unique installation features

Finger Protector is the only product that can be fitted without perforating the door. It maintains the integrity and operation of fire doors and therefore requires no asbestos survey prior to installation

Finger Protector can be attached to any surface without damage, even glass doors

Finger Protector is unchallenged as the world's best door safety system. Finger Protector is a registered trade mark, patented and manufactured to ISO9000, fire / adhesive tested to BS476, SI755 and ISO1182.

Finger Protector is distributed by:
Insight Security, Unit 2, Cliffe Industrial Estate,
Lewes, East Sussex, BN8 6JL

Over 40,000 children each year require hospital treatment after trapping fingers in doors!

New Government legislation means you can now be fined up to £20,000 if you don't take appropriate precautions to prevent these accidents

It only takes a split second for a door to cause agonising and sometimes permanent injury

Here's a simple, low cost solution ...

Order **Finger Protector** today... and you'll never have to deal with the trauma of crushed fingers

- **Quick and easy to install**

Can be fitted in less than a minute with no special DIY skills or tools.

- **Fits all doors**

The only universal design that is totally effective without hindering operation of all types of; standard, rising and pivot hinge doors – even 180° opening.

- **Affordable**

The best costs less. Simplicity in design makes Finger Protector more effective at a much lower cost than clumsy alternatives.

- **Peace of mind**

Backed by a 5 year manufacturers warranty. Once fitted, Finger Protector will give many years of safety protection and maintenance free service.

How serious is the risk?

- **32,000lb of pressure**

The guillotine effect of a closing door can horribly mutilate fingers, causing permanent damage, even amputation.

- **40,000 accidents a year**

The Government's estimate of the number of accidents requiring hospital treatment as a result of fingers trapped in doors.

You can **stop** it happening

Schools, restaurants,
hotels, public buildings
and in the home...
Finger Protector is
chosen by people who
care about child safety!
