Burglars often favour entry to the rear of your property over your garden fence or wall where they are less likely to be seen.

School-children may use your garden as a shortcut or may forever be climbing over your fences, walls or your flat roof to recover a ball, etc.

Whatever the reason and whoever the culprit, such unwelcome entry onto your property is obviously an intrusion of your privacy, could make breaking into your home easier and could also result in damage to your garden as well as to your fences, gates, walls, or flat roof.

Once upon a time people used to embed broken glass or nails into concrete as a wall topping to deter intruders climbing over. And for a while, carpet gripper strip became a favoured solution for protecting fence tops. **These methods are now illegal and anyone still using them, faces a serious risk of prosecution and hefty fines.**

Prikla Strip offers an easily affordable, practical way to deter burglars and other unwelcome visitors from climbing into your garden, onto your flat roof, etc. It's an inexpensive yet attractive wall / fence topping which is used for protecting both domestic and commercial properties.

Manufactured from robust UV (ultra violet) balanced brown weatherproof recycled plastic, it blends comfortably into most environments. It's quick and easy to fit - simply screw the strips (through the pre-formed fixing holes) to the top surface of your fence, gate or wall.

Safe to Use

- this simple, affordable and practical solution can be used in any location where you want to deter intruders or animals without using a product which could be life threatening or risk causing serious injury to intruders or pets. For obvious safety reasons, the installation of Prikla Strip at a height of less than head height is not recommended.

Each Prikla Strip is 462 x 48mm (approx. 18" x 2") with a spike height of 20mm (approx. 3/4"). Prikla Strips can be purchased individually or in special 'Multisaver Packs of 10'

The use of suitable warning signs is strongly recommended where the product is intended for use to protect commercial premises.
