

Rosengrens Polaris

Fire Protection for Data Media

Rosengrens Polaris range is the new generation data media cabinets, tested and certified to withstand a fire for 2 hours.

The Polaris range is designed to offer the maximum storage capacity within the minimum footprint and space. An extensive range of interior fittings ensures that these data safes can be customised to meet each users specific storage requirements. Different sizes and types of data media can be mixed and stored efficiently, with the focus being on storage of CDs and DLT magnetic tapes. The cabinets are available in 5 different sizes and are all equipped with a boltwork that gives good burglary resistance. Choose between key lock, combination lock or electronic lock. Dual locking is also possible.

Rosengrens Polaris

2 Hour Fire Protection for Data Media

Product data								
Model	External dimensions (mm)			Internal dimensions (mm)			Weight** kgs	Vol. lit
	Height	Width	Depth*	Height	Width	Depth		
D120	920	750	720	570	490	400	318	115
D170	1200	750	720	850	490	400	395	171
D230	1480	750	720	1130	490	400	495	227
D320	1950	750	720	1580 (1600)	490	400	645 (635)	316 (321)
D570	1950	1040	770	1580 (1600)	780	460	865 (840)	577 (587)

Figures within () are valid for D320 and D570 approved by UL to Class 125 2H. For remaining models the figures are the same for both certifications.
 * Dimensions exclude 61 mm for handle. ** Weights without interior fittings and packing.

Fire protection: The Rosengrens Polaris series has been tested and approved to EN 1047-1 and certified by ECB'S to the fire resistance of S 120 DIS, which means 2 hours' fire protection. The range also holds an American UL certificate to the Class 125 2 H with fire and impact, which means 2 hours' fire protection.

Lock: Various lock options are available, Rosengrens key lock RKL-10, combination lock and electronic lock in different levels. All locks are tested and you can choose between single or dual locking. With the heavy locking bolt work the cabinets have a good burglary resistance.

Design: The design is functional and elegant with a light colour scheme, built-in hinges and a functional handle with push and seal closure as standard. Thanks to the cabinets smaller external dimensions in relation to capacity the cabinets blend in well with most environments.

Quality and environmental management systems: The Rosengrens Polaris series are all manufactured in accordance with the ISO 9001 quality management system and the ISO 14000 environmental management system.

Quality control: Rosengrens Polaris has been developed and continuously tested according to the Gunnebo Quality Guidelines which include several criteria relating to existing European norms with the aim of guaranteeing quality and assuring customers that the products live up to the highest expectations.

Maximum storage capacity of datamedia								
Type of datamedia	Size in mm	Media/shelf		Total number of datamedia/number of shelves
