

Protecting cash, keys, sensitive documents or computer media, in transit is something many organisations are regularly faced with. Our range of re-usable security bags and pouches offer the ideal solution and are easily affordable. Post Office approved and carrier preferred, each bag is protected by a special security seal which allows the recipient to check that the contents have not been tampered with since the seal was applied by the sender.

To open the bag, the recipient simply breaks off the special security seal and releases the zip (or 'T' bar / drawcord) type closure. (A broken seal on receipt of the bag / pouch indicates unauthorised access to the contents during storage or transit.) To re-use the bag, having inserted the item(s) to be sent or stored, the zip is closed and a new seal is applied.

Opaque low density polyethelene, available in three standard sizes, each with write on panels, bespoke design option available for volume orders

SC EVB1 180 x 250 (7x10")

SC EVB2 240 x 380 (9.5x15")

SC EVB3 320 x 460 (13x18")

One trip self seal evidence bags are available in various stock sizes and offer an inexpensive way of protecting items against tampering during storage or whilst in transit.

Security features include; Uniquely numbered bags, triple welded seams and tamper evident sealing tape to protect the contents.

Cash trolleys

Carefully engineered for years of reliable service, these robust units are fitted with large wheels to make cross pavement / cross car park journeys as easy as wheeling the unit around within the store. All models incorporate a cash collection flap in the top section of the rear wall and a robust removable collection box.

We are pleased to offer a choice of three standard models:

prod ref **SC CTR01** H-730 W-320 D-320mm
This unit is designed for lightweight coin loads.

prod ref **SC CTR02** H-910 W-320 D-550mm
This unit is designed for heavy coin loads.

prod ref **SC CTR03** H-950 W-390 D-400mm
Alarmed
Designed for lightweight coin loads, this unit incorporates an alarm and also a top dispenser drawer with lockable lid.

Till safes

Securely bolted under / adjacent to the till, this rugged but aesthetic unit provides the cashier with a speedy and safe method of securing notes, cheques and credit card vouchers, thus rendering them inaccessible to the opportunist thief.

This large capacity unit offers temporary storage for up to 350 notes, reducing the need for frequent till collections and the obvious security risks they represent.

Notes are automatically stacked in a secure inner container enabling collections to be made quicker and counting easier.

The till safe offers safe storage for cash until the scheduled cash collection time.

Smoke & dye products

The best way to transfer cash to or from a bank, etc. is to use a professional cash carrying company. As this may not always be a practical or commercially viable option however, if you have to undertake your own cash carrying, you should be aware that you have obligations towards your insurers, and possibly legal obligations too.

Insurers require that you take 'reasonable precautions' when carrying cash, failure to do so may result in a rejected claim in the event of a loss. If relying on employees to transport your cash, then you also have a responsibility under the Health and Safety at Work Act to ensure that any risk that they may be exposed to is addressed and minimised.

We are pleased to offer a range of products such as carry bags or briefcases fitted with smoke and / or dye protection systems, alarms, etc. which offer protection to the carrier as well as the contents of the case.

Note: where cash is packed in an internal cash bag within the carry bag, the internal bag should be of the mesh type to allow dye to permeate the cash in the event of the unit being triggered.

An example of our range of smoke and dye protected cash bags and containers.

If triggered the dye permanently stains the notes making them unusable.
