

ALARMS

Personal security alarms

Our personal security alarms are UK manufactured to the highest standards. Audible to 1/2 mile, the SG100 has a tough ABS case, rip cord operation (+ test button), and is supplied with a belt clip and door/car mounting bracket. The SG100ST alarm (not illustrated) also incorporates a flashing strobe-light and torch facility. These alarms can be used independently or with optional accessories which plug in to the rip cord socket, i.e. the window/door switch or panic button (as shown). The popular interview room 'panic alarm' pack comprising; a panic button (with 5 metre cable), and alarm unit is a low cost safety aid for staff in any location where one to one meetings are held. (Ideal for health centres, doctors surgeries, interview rooms, etc.)

- LD SG100** Personal alarm supplied with heavy duty PP3 type battery

ALARMS

Entrance alarms

Ideal for protecting garages, out-houses, etc. Our battery operated dual sensor alarm features both PIR and magnetic contact sensors.

The alarm is equipped with a loud, penetrating 120db siren and is supplied with two key-fob controllers.

LE PIR22 Battery operated – PIR + magnetic contact alarm

Visitor annunciator

A simple but effective battery operated visitor annunciator. As the visitor walks through the sensor area the unit emits a gentle chime. The unit is equipped with two volume settings and an on/off switch.

LE CHIME Battery operated – ‘break beam’ visitor annunciator
