

locks defeated by pipe wrench

Most padlocks are defeated with brute force and a pipe wrench! (see above).

Why become another victim when ROTALOK, with its unique rotating hardened steel sleeve offers an effective, simple and affordable solution.

The ROTALOK product range includes padlocks, brackets, and ground anchors.

Rugged, high quality materials combined with unique construction makes the Rotalok one of the most effective padlocks available and competitive pricing makes it excellent value for money. Recommended by Police and Insurers, Rotalok padlocks and accessories (heavy duty chains, padlock brackets and ground anchors) are all 'sold secure' tested and approved. Rotalok padlocks have been issued a NATO stock number and are used by the MOD (for securing explosives stores among other things). Used with a 100% success record, Rotalocks were highly praised by the

Army during front line service in Bosnia where many alternative padlocks failed under attack. Tested to destruction by the Merseyside Fire and Civil Defence Authority the padlock caused extensive damage to the hydraulic cutters used during the attack resulting in a directive to all staff not to tackle Rotalok in the field except as a last resort.

**ROTALOK padlock models**

- Standard shackle
- Semi enclosed shackle
- Fully enclosed shackle

**Keying options & features**

Supplied as standard with an 'insurance approved' 6 pin euro profile cylinder, other options are available. For convenience ROTALOK padlocks can be 'master keyed' or 'keyed alike' in suites and can also be keyed to match many standard door locks.

**High security accessories**

- Heavy duty chains (11.2mm links)
- Padlock bracket / hasp
- Special ground anchor

When Merseyside Fire and Civil Defence Authority tried to cut the Rotalocks' special steel alloy shackle with their hydraulic cutters they broke the blades!

Guardian 70 (prod ref GARD70)

Monolith 80 (prod ref VI4144)

Ideal for use with chains or with the special shrouded Discuss hasp as shown

Our vinyl sheathed Atlantic range of marine padlocks offer superior mechanisms, whilst our combination locks offer an alternative to conventional key locking

## PADLOCKS

### ROTALOCK – high security padlocks

- Open / semi enclosed and close shackle models
- Accepts standard euro-profile lock cylinder (can be keyed alike or master keyed to standard door lock)
- Rotating body protects against pipewrench attack.
- Resistant to drilling, picking, freezing attack.
- Suitable for use in harsh environments

*ROTALOCK – the ultimate protector – as used by the military, utilities, power stations and airports.*

Model	RO1	RO1SE	RO1CS
size (mm) overall	H-95 W-60	95 x 60	95 x 60
locking elements	6 pin (std)	6 pin (std)	6 pin (std)
shackle diameter	12	12	12
vertical clearance	21.5	21.5	21.5

shackle type	rotating	rotating	rotating
for chains up to	10mm	13mm	10mm

### DISCUSS – Padlocks

- Double locking – resistant to drilling and picking
- Tough laminated stainless steel construction
- Hardened steel plate to protect the shackle gap.

*The 70mm unit has a 5 pin tumbler mechanism as standard while the 80mm unit incorporates the 6 pin high security dimple key mechanism.*

model	DSC80H	DSC70
size (mm) width	80	70
locking elements	6 pin (std)	5 pin (std)
shackle diameter	11	10
vertical clearance	19	17
horizontal clearance	24.5	20
shackle type	close	close
for chains up to	11.5mm	8mm

### Master Pro – security padlocks (MP6nnn)

The Master Pro range of padlocks offer robust security in a choice of style and size. Incorporating features such as a 6 pin, dual ball bearing locking mechanism, thermoplastic sheathed laminated steel or solid hardened steel body and a hardened boron steel alloy shackle, they represent excellent value for money.

**The padlocks shown on this page have been carefully selected for their ‘value for money’ and performance qualities. Our range is however subject to continuous review and expansion and we can supply any padlock to order. Many of our locks are available with keyed alike or master keyed suite keying options. We also offer a comprehensive range of accessories including: padbars, hasps and high security chains.**
