

23 PLANT & EQUIPMENT SECURITY

Many organisations in the private and public sectors have a significant yet sometimes overlooked investment in plant and equipment that is at risk from thieves or vandals. Ride on mowers, compressors and trailers are just some of the many essential everyday tools which would be inconvenient to lose and expensive to replace. Storing such items in a secure compound, outbuilding or even cage may provide a practical solution, as may using security chains in conjunction with appropriate padlocks and robust ground or wall anchors.

quality ride on mowers are just one target for thieves

Tools are another essential which need protecting. Our range of secure storage boxes offer robust protection against theft and can be bolted into position within a building or outhouse, or even within a vehicle.

Available in a range of sizes, all units being manufactured from heavy grade formed and welded steel plate and equipped with two locks.

Cages offer a simple, convenient and affordable way to protect items from gas bottles to smaller items of plant.

Larger structures with or without a lid, are often used to form a secure storage area larger items of plant, whilst within a warehouse complex, larger complete cages are often used as bonded storage areas for clients free issue stock, etc.

The Garage Defender is specifically designed to protect against the unauthorised opening of 'up and over' type garage doors.

Cycle lockers

Cycling is healthy exercise and an essential means of transport for a significant portion of the UKs population. This cleverly designed, compact, secure storage unit offers a minimal footprint which requires only a fraction of the groundspace of other units (12 lockers fit into just 2 standard car parking spaces). Protects bikes from thieves, rain, bird strikes, etc. Existing users include:

- schools, colleges, universities
- railway stations
- community and sports centres
- supermarkets, shops, shopping centres
- large employers

Many organisations make a small charge for the use of this type of facility, e.g. students pay a small sum for a 'term rental', commuters pay a per use fee, (coin or token operated locks can be fitted as an option). The Government is keen to back the cycling initiative, grants may be available to schools and other organisations, investing in these units.

Space efficient, secure cycle lockers
