## Lock Group Options

### Keyed to differ

Where multiple locks are purchased, they will as standard be supplied with each lock being keyed differently, so the keys supplied with each lock, will only fit that lock.

### Keyed Alike

For operational convenience, where multiple locks are purchased, we can offer a Keyed Alike (keyed to the same key pattern) lock suite, which means that all locks supplied in that lock suite can be operated from any of the keys from any of the locks in that suite.

### Master Keyed

If you need a number of locks which are keyed differently but you require one master key that will open any of the locks, we can accommodate that by supplying you with locks in a Master Keyed Lock Suite. A Master Keyed Suite can include one or more Keyed Alike lock suites as well as uniquely keyed individual locks.
