KINMAR PERMANENT SLEEVE ANCHORS

1 WAY

- Unique Kinmar permanent driver socket is required which offers an accurate torque controlled security fixing which can be re-torqued if necessary.
- Available in bright zinc plated steel (CR3).
- Quick and easy through fixing, ideal for permanent fixtures.

KINMAR REMOVABLE SLEEVE ANCHORS

2 WAY

- Unique Kinmar removable driver socket is required for installation and removal.
- Extra resilient to attack because of its rounded shape and case hardened steel construction.
- Available in bright zinc plated steel (CR3).
- Quick and easy through fixing, ideal for applications where the anchor may need to be removed at a later date.

6-LOBE PIN SLEEVE ANCHOR

2 WAY

- Requires matching driver bit for installation and removal.
- Available in quality A2 stainless steel in buttonhead and countersunk versions.
- Fast and simple installation which leaves a neat tamper resistant finish.

PIN-HEX SECURITY GRILLE ANCHORS

2 WAY

- This anchor can be removed using the correct security installation tool.
- This heavy duty shield anchor is available in plated steel in a button head.
- Save time and money when fixing grilles.

DRILL OUT SECURITY GRILLE ANCHORS

1 WAY

- Permanent heavy duty anchor which uses standard hexagon driver bit to install.
- When the anchor is fully expanded drill out the standard hexagon aperture with an HSS drill bit, to leave a tamper resistant circular finish.
- Available in plated steel in an 8.8 button head.
- This anchor saves the installer from welding bolt heads or rounding them off for security.

DETER THEFT & VANDALISM

SPECIAL MADE TO MEASURE SECURITY FASTENERS

- Male and female 2-hole security bolts in stainless steel or BZP in pan head and countersunk. Useful for clamping components together. Removal with correct tooling.
- Security grub screws in 2-hole, Hex-pin and 6-Lobe pin in stainless steel and plated steel. Removable with correct tooling.

- Shear bolts - high security permanent bolt fastening. The hexagon part of the bolt shears off leaving a plain tamper resistant head. Uses standard socket or spanner. Available in galvanised and bright zinc plated steel and stainless steel.
- If you cannot find the security fixing you are looking for then send your drawings. We may be able to help you.

SECURITY FIXINGS

REDUCE THE RISK

Protect your property

by using

Security Fasteners

2 HOLE SECURITY SCREWS

2 WAY

- Unique 2-pin driver tool is required for installation and removal.
- Available in stainless steel self tappers and machine screws, pan head and countersunk including M3.5 raised countersunk.
- Aesthetically pleasing design.
- For low to medium torque applications.
- Sometimes known as 'Snake-eye®' or 'Pig nose' screws.

PIN-HEX SECURITY SCREWS

2 WAY

- Virtually impossible to remove without the matching screwdriver bit.
- Available in stainless steel self tappers and machine screw threads in button head and countersunk including M3.5 raised countersunk.
- Suitable for medium torque applications.
- Extensive range of sizes.

6-LOLOBE PIN SECURITY SCREWS

2 WAY

- Star drive with pin, sometimes called Pin Torx. Requires matching driver tool for installation and removal.
- Available in Stainless Steel self tappers and machine screws, in button head and countersunk, including M3.5 raised countersunk.
- Suitable for higher torque applications.
- Self drilling screws and other special threads for concrete, metal and plastic. To order only.

CLUTCH HEAD SECURITY SCREWS

1 WAY

- Only operates in clockwise direction using a standard slotted screwdriver which leaves an ideal permanent fixing.
- Available in countersunk bright zinc plated hardened woodscrews and stainless steel self tappers in countersunk and round head.
- This drive system was probably the world's first security screw.

AUTHORISED ACCESS ONLY

SENTINEL SECURITY SCREWS

1 WAY

- One way security screw that uses standard pozi or Superdrive bits for an ideal permanent fixing.
- Available in bright zinc plated hardened steel woodscrews in a countersunk head and metric machine screws in a countersunk and pan head.
- Easy and fast application with power tools.

OVAL PAN HEAD SECURITY SCREWS

2 WAY

- Looks round but is in fact oval. Often mistaken for a weld stud or rivet.
- Installation and removal only by using the special oval shaped socket.
- Available in case hardened steel in bright zinc plated finish.
- Suitable for low to medium torque applications.

NOGO SECURITY ENCLOSURES

1 WAY

- High security bolt and nut enclosure, simply fix standard bolt or nut through the base, then hammer cap over the top for a secure fastening.
- Ideal permanent fixing virtually impossible to remove with normal tools.
- Case hardened plated steel finish.
- Patented product. Home Office approved.

KINMAR PERMANENT NUTS

1 WAY

- Unique patented high torque permanent drive.
- A superior alternative to the shear nut, which leaves no unplated surfaces. Matching driver socket allows you to tighten fastener to desired torque, leaving it tamper resistant. Can be re-torqued if required.
- Available in bright zinc plated steel, galvanised steel and stainless steel.
- Kinmar permanent bolts available to order.

KINMAR REMOVABLE NUTS

2 WAY

- Unique patented high security removable nut which can only be undone with the matching socket tool.
- Available in bright zinc plated steel, galvanised steel and stainless steel.
- Extra resilient to attack because of its rounded shape and case hardened steel construction.
- Probably the most cost effective removable security nut on the market.
- Kinmar removable bolts available to order.

SAVE TIME AND MONEY

ARMOUR RING CAPS

1 WAY

- Conical collar which is hammered over the top of any standard hexagon bolt head or nut, rendering it tamper resistant.
- Available in bright zinc plated steel and stainless steel.
- Ideal smooth finish for existing fasteners.
- Suitable for any British Standard or DIN standard hexagon bolts or nuts, including hexagon head coach screws.
- Cannot easily be removed, Patented design which is Home Office approved.

SHEAR NUTS

1 WAY

- High security permanent nut fastening, Hexagonal part of nut shears off at predetermined torque (because only the cone part is threaded) leaving a totally tamperproof cone.
- Available in galvanised steel, bright zinc plated steel and stainless steel.
- Uses standard socket or spanner.
- Shear bolt available to order.

SCROLL NUTS

2 WAY

- High security nut fastening.
- Unique matching driver socket required for installation and removal.
- Available in stainless steel.
- Suitable for medium to high torque applications.

TORXplus SECURITY SCREWS

2 WAY

- This star-drive has 5 lobes instead of 6 which provides a higher level of security, as the system is patented.
- Tooling availability is restricted to bonafide Torxplus customers. All drivers are logged for extra security.
- Quality elliptical drive suitable for higher torque applications.
- Available in stainless steel self tappers, machine screws available to order, subject to M.O.Q.

KEYED-LOK SECURITY SCREWS

2 WAY

- This exclusive system enables every customer to have their own unique personalised head design and drive key specifically for their application.
- Available in stainless steel and plated steel, self tappers and machine screws in countersunk and button head.
- Manufactured to customer requirements, subject to minimum order quantities.
